# CHAPTER V

# CONCLUSION AND SUGGESTIONS

In this chapter, the writer presents discussion about conclusion and suggestions. The conclusions are described based on the result in previous chapters while the suggestions will be used as consideration for the teachers and also other researcher who wants to use Modified Domino Cards Game.

## A. Conclusion

Based on data analysis which was explained in the research findings, by statistical calculation using SPSS 16.0 it can be seen that the mean of pre-test was 49 and the mean of post-test was 84.56. It showed that the mean score of post-test was higher than the mean score of pre-test. The treatment that was given has effective on students' vocabulary mastery in the experimental class. Therefore, there was significant difference achievement in vocabulary mastery before and after taught by using Modified Domino Cards Game. Then, the result of Independent Sample t-test showed that the significance value is smaller than signiflcance level (0.000<0.05). So, the alternative hypothesis (Ha) was accepted and the null hypothesis was rejected. It means also there was significant difference achievement in vocabulary mastery before and after taught by using Modified Domino Cards Game. From the explanation above, the researcher conclude that Modified Domino Cards Game is effective in teaching vocabulary mastery at the first grade of MTsN 5 Tulungagung in the academic year 2018/2019.

**B. Suggestions**

1. For Teachers

   In teaching and learning English, the English teacher should select good strategy that is not only interesting but also appropriate with the subject and the students' need such as Modified Domino Cards Game. This game will make students more active in learning vocabulary. The English teacher can use Modified Domino Cards Game to teach vocabulary because it is effective to teach in Junior High School. It can help students in memorizing vocabulary because the students enjoy learning vocabulary.

2. Future Researchers

   For further researchers, this research is not perfect yet. The researcher suggested to useModified Domino Cards Game not only in learning vocabulary but also in all kinds of skills in English and they are supposed to conduct the study by giving more treatment. So, the future researcher can make their studies more complete and can use another skill and design.
