

CHAPTER V

CONCLUSION AND SUGGESTION

Based on the findings presented in previous chapter, this chapter presents the conclusions and suggestions relevant to the findings.

A. Conclusions

Based on the research that was carried out at seventh grade students of MTs Assyafi'iyah Gondang Tulungagung, the result of the research gives the conclusion to this research, using Bamboo Dancing method on students' speaking achievement significantly increased. It can be seen from the differences in students' speaking score in pre-test or before given the treatment and students' speaking score in post-test or after given the treatment. The mean of students' score in pre-test was 8.74 becomes 11.82 in post test. It proves that Bamboo Dancing method can improve students' speaking achievement because the mean of post-test score was larger than the mean of pre-test score.

In conclusion, the Bamboo Dancing method is effective to be used in teaching speaking. It can make the students more active and enthusiasm during teaching and learning process in the class. Besides, it can develop pronunciation, fluency, grammar, vocabulary and expressions choice. So, it can be concluded that Bamboo Dancing method was effective method on

seventh grade students' speaking achievement at MTs Assyafi'iyah Gondang Tulungagung.

B. Suggestion

Considering the result of the study, the researcher would like to give some suggestion, they are as follow:

1. For the teacher

- a. Bamboo Dancing method can be applied in English teaching and learning process as one of the new way in teaching speaking, aiming to improve and develop students' speaking achievement.
- b. The teacher should be creative in teaching speaking. The teacher should make teaching and learning process becomes interesting. In addition, the teacher is encouraged to use some new technique or method, one of them is Bamboo Dancing method. Because it makes the students will becomes motivated and curious with something that they do not know before. So, the students will easier to master speaking skill.

2. For further researcher

Hopefully if the researcher wants to conduct the next study that still related to the effectiveness of using Bamboo Dancing method can be better than this research. The future researcher can develop other skill and make this material of this study more interesting. In this research is pre-

experimental research design, for the next researcher who conducts the same method is suggested to use large groups with different design of this research. The researcher hopes that this research can use as reference for the future researcher.
