CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher presents some points related to this research including conclusion and suggestion. Conclusion is described after the result of finding research in previous study and suggestion will be used to improve teaching reading for the teacher and the future researcher.

A. Conclusion

Based on the data analysis which was explained in the reseach finding by using IBM SPSS 16.0, it can be seen that the mean of pre-test was 63.50 and post-test was 80.50. It showed that there was an improvement achievement on the students' reading comprehension in recount text after getting treatment by using chunking a text strategy. Then, the result of T-test showed that the significance value was 0.000. It was smaller than significant level (0.000 < 0.05).). So, the alternative hypothesis (H$_a$) is not rejected and null hypothesis (H$_o$) was rejected. It meant that there was significant difference achievement in reading comprehension before and after being taught by using chunking a text strategy. From the explanation above, the researcher concludes that chunking a text strategy is effective in teaching reading comprehension of recount text at the second grade of MTs Mujahidin Ngadiluwih Kediri in the academic year 2018/2019.

B. Suggestion

1. For Teachers

   In teaching and learning English especially to improve students' reading ability, the teacher should select a good strategy not onlyto attract students' interest and feel enjoyable, but also appropiate with the subject such as chunking a text strategy. This strategy will make students more active in learning reading. The teacher can apply this strategy based on the students' need to improve reading comprehension. It can help students understand and remember information easily, getting main idea, overcome students' problem in unlocking and misunderstanding words.

2. Future Researchers

   The researcher is expected to the future researcher to use this research as the reference for their study. Beside that the researcher hopes that this research have a big contribution for the future researcher in conducting the same study although this research is not perfect enough on the way to devided times in conducting steps of chunking and explain clearly how chunking in getting structure of recount text, so search way to explain easily how process to chunk as good as possible.
