

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. CONCLUSION

The conclusion answer of the research objective is the Voice of America (VOA) News is effective to improve the students' vocabulary achievement of the first grade at MAN 1 Trenggalek. The researcher found the significant of independent sample by using SPSS program 23 version. The result showed that the significant value (sig-2 tailed) was 0.00, the research was one-tailed and the (*P-Value*) was divided by two:  $0.00/2 = 0.00$ . The result was smaller than 0.05 ( $0.00 < 0.05$ ). The null hypothesis of this research was the mean of the class which taught by using Voice of America (VOA) News is smaller than or equal to the class which taught without using Voice of America (VOA) News. The alternative hypothesis was the mean of the class which taught by using Voice of America (VOA) News is higher than the mean of the class which taught without using Voice of America (VOA) News.

From the data finding, the data showed that the sig of research was 0.00 was smaller than 0.05. it meant that the null hypothesis is rejected and the alternative hypothesis cannot be rejected. The conclusion was that Voice of America was effective to improve students' vocabulary achievement especially the first grade of senior high school at MAN 1 Trenggalek.

## **B. SUGGESTION**

Based on the research result, the researcher would like to give the following suggestions:

### **1. Teachers**

The result of this result can be used by teachers in teaching learning process, especially for improving students' vocabulary. The teachers can use voice of America (VOA) News in the teaching and learning process in the class.

### **2. Future researcher**

The finding of this research may help them to study related with this topic by more interesting strategy and result. The researchers can also apply this media teaching in the any age and level of students.
