CHAPTER V

CONCLUSION AND SUGGESTIONS

In this chapter, the writer presents discussion about conclusion and suggestions. The findings of the data and discussions in the previous chapters.

A. Conclusion

Based on data analysis which was explained in the research findings, by statistical calculation using SPSS 23.0 it can be seen that the mean of pretest in the experimental group was 59.67 and the mean of post-test was 80.00. It showed that the mean score of post-test was higher than the mean score of pre-test. The treatment that was given has effective on students' reading comprehension in the experimental class. Therefore, there was significant difference achievement in reading comprehension before and after taught by using Cooperative Script. Then, the result of Independent Sample t-test showed that the significance value is smaller than significance level (0.000<0.05). So, the alternative hypothesis (Ha) was accepted and the null hypothesis was rejected. It means also there was significant difference achievement in vocabulary mastery before and after taught by using Cooperative Script. From the explanation above, the researcher conclude that Cooperative Script is effective in teaching reading comprehension at the first grade of MA Hasanuddin Siraman in the academic year 2018/2019.

B. Suggestions

1. For teachers

In teaching and learning English, the English teacher should select good strategy that is not only interesting but also appropriate with the subject and the students' need such as Cooperative Script. This technique will make students easier to improve reading comprehension ability in reading reading English correctly. The English teacher can use Cooperative Script to teach reading comprehension because it is effective to teach in senior high school. It can help students in can practice their reading ability by reading a lot in some English magazine, English newspaper etc.

2. For researchers

For further researchers, the researcher suggested using Cooperative Script Technique not only in learning reading but also in all kinds of skills in English and they are supposed to conduct the study by giving more treatment. So, the future researcher can make their studies more complete and can use another skills and design.
