

## CHAPTER III

### RESEARCH METHOD

This chapter describes the research method which is implemented in the present study. This chapter consist of the research design, research setting, subject of the study, procedure of the study.

#### A. Research Design

This research used Classroom Action Research (CAR). Classroom Action Research is a study carried out in the classroom. Elliot (2000 : 93) states that classroom action research is the process of through which teachers collaborate in evaluating their jointly, raise awareness of their personal theory, articulate a shared conception of values, try out new strategies to render the value expressed in their practice more consist with the educational values they expouse, record their word in a form which readily available to and understandable by other teacher and thus develop a shared theory of teaching by researching practice, Classroom Action Research is done collaborative and participatory.

According to Donald Ary, (2010 : 215) Classroom Action Research is about taking action based on research and researching the action taken. Action research has been used in variety of settings, including schools, hospitals, health clinics, community agencies, government units, and others environments. It can be used to enhance everyday work practices, to resolve specific problems, and to develop special projects and program.

The reseacher use a collaborative action research in which the reseacher and one of other English teacher conducted with research. In this case, the researcher and collaborative teacher
