

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter the researcher presented two points, conclusion and suggestion. The conclusion is referring after getting and counting a result from research previously on chapter IV and the suggestion for next research can be taken as reference.

A. Conclusion

In this research knowed different between students' speaking ability before and after being taught by using Flashcard media at eight grade students of SMPN 1 Tanggunggunung. Through investigating and data analysis found in field by using pre-test and post-test scores, it concluded that teaching speaking using flashcard be able to accepted and effective for students.

The result of research shown in chapter IV explain that score before did treatments by using flashcard mean score was 66.17 in other side after students had gotten treatments and the mean score in post test was 82.00. It another result of pretest and posttest calculated with IBM SPSS 16, researcher concluded that using flashcard was effective toward students' speaking skill at eight grade of SMPN 1 Tanggunggunung in academic year 2018/2019.

B. Suggestion

The researcher having several suggestions to teachers for enhanced students speaking skill especially to get better in learning english based on finding research, that suggestions as follows:

1. For the English Teachers

Flashcard media is one of medias which can be applied in teaching speaking in any level grade it's not only one for eight grade students. The researcher hopes it was media can make simply and useful for english teachers while they will to improve students speaking ability. Teacher can motivate students more active with this media because learning process requires active participants by giving the good media for them to created it in the classroom.

2. For the Students

The students after accepted flashcard media, it can gives them be more confident to use english not only in the class but must be in their outside activities from the classroom. Students can be practiced speaking with other friends such as discussing something, find out the solutions or asking questions, talking their activity with friends or teachers and others.

3. For the Next Researchers

The researcher realizes that this research gives a little bit knowledge but it could be taken as a reference for next researchers. Next researchers can make a improvisation to be better further research in any field subject and more get a good research.
