

CHAPTER VI

CONCLUSION AND SUGGESTION

This chapter, the researcher presented the conclusion based on the research finding and discussion as presented in the previous chapter of the research in previous chapter.

A. Conclusion

Dealing with the research finding and discussion before, the conclusions were:

1. The teacher creates an interactive teaching and learning Syntax through WhatsApp group

The teacher creates the activity that made the learning process was interactive enough. There are three activities during the online learning process. Then, there was question and answer section in main-activity that made the interaction between the lecturer and the students, also the students and others; they could participate in the class, so the class was active, responsive. Besides it, in this case WhatsApp could be indicated as an interactive learning media because the students and the lecturer also utilize the WhatsApp features well. The WhatsApp features that usually used were share documents, text, photos, share link sub-feature, and emoji sub-feature. the online learning process in WhatsApp group was effective enough. The students could be interaction each others; they could participate in the class, so the class was active, responsive.

2. The students perceive about the using of WhatsApp group during the learning process

Overall the using of WhatsApp group in learning Syntax got the positive perception by the students. They felt could share their opinion, interact each other, and they were not shy if they wanted ask. So, the online learning made the students was more active than offline class.

3. WhatsApp indicated as an interactive learning media

In this research, WhatsApp could be as an interactive media because it was supported by the rules of the lecturer, the activities in the class, and the utilization of WhatsApp features. The factors that showed WhatsApp as an interactive learning media were: it was interactive, responsive, controllable, appearing the participation, used independently, convergent features.

B. Suggestion

The suggestions from the researcher were:

1. For the lecturer

WhatsApp was proved as an interactive learning media in this research, so the researcher suggests for the lecturers to use this media in online class. But, the lecturers also must be concern to think about the rules and the activities that made the students more interactive, and the students are not bored about the learning process. WhatsApp is application that most of people ever used it. It makes easy to be applied. Although WhatsApp is the application to communicate, but it can be as an interactive learning media; the features can support for online learning and interact each

members of WhatsApp group easily, as like online learning on English Syntax subject.

2. For future researcher

The suggestion for the future researcher who wants to conduct the study related to WhatsApp, can be used this paper as additional references. But, the researcher suggests conducting the research with the different aspect and also subject, for example conducting research about the using of WhatsApp was an interactive media to enhance the self-confidence in public speaking subject, or others.
