

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents two parts. The first part conclusion of the study related to improve students vocabulary. The second part talks about suggestions are considered that may be useful for the English teacher and other researcher.

A. Conclusions

Based on the research results described in chapter IV, it can be concluded that there is an improvement in scores and percentage achievement in the vocabulary test students taught using Duolingo applications taught for first grade students at MA At – Thohiriyah Ngantru. Therefore, Duolingo application can be used to teach vocabulary because Duolingo application can improve students' vocabulary. Student achievement in vocabulary tests taught by Duolingo application is excellent. The total was 88% of 17 students successfully reached the score that suitable with the success criteria and student's achievement in vocabulary test before using Duolingo application only 35% of students successfully passed the vocabulary test.

From the vocabulary test results in each cycle, it can be concluded that Duolingo application are proven to improve vocabulary. Applied Duolingo application in the classroom can made easier for students to learn vocabulary. Moreover, how to applied Duolingo application was very easy, first students only need to download Duolingo application on their

smartphones, then they could start worked on the questions that were in Duolingo application. The teacher asked students to discuss with friends to make it easier for them to solve problems in Duolingo's application. The teacher also asked students to write questions and answers that they have worked from the Duolingo application in their notebook to make them easier to read and learned it again.

From the result of the research in the first cycle, the researcher found that the students who passed the test increased. 17 students (70%) passed the test and 5 students (30%) did not pass the exam in the first cycle. But the percentage test in the first cycle have not yet reached the success criteria. After conducted the second cycle test, the researcher found an improving in student test. A total of 15 students (88%) successfully passed the test and 2 students (12%) didn't passed the test. In the cycle 2 test students succeeded beyond the success criteria. It can be concluded if the Duolingo application can be used to improve students' vocabulary and effective to be a learning media in the classroom.

The conclusions described the actions that were successful and were not really successful. They could be considered as some ways to improve the students' vocabulary using Duolingo application. The implications of the actions are described below.

1. The more students using the duolingo application as learning media, they will be able to improve their vocabulary, and make it easier for them to understand the meaning in sentences.

2. Duolingo application is an interesting application, so students will not get bored easily when learning English. And the Duolingo application can facilitate teachers in teaching and learning activities, teachers only need to modify student learning methods using the media to make it more fun and increase student interest in learning
3. The weaknesses were found in this research such as the limited time when the learning process. The student understanding and student interest in learning vocabulary. Therefore teachers must be able to apply appropriate techniques, to attract students' attention. And these weaknesses can be used as a reference to minimize obstacles that occur in the classroom.

B. Suggestions

- For teachers:

Teachers can use the Duolingo application as an learning media to improve students' vocabulary. Learning methods using Duolingo can be applied at the time of a pandemic that required students to learn from home. With the Duolingo, application students will be more helped in the learning process especially in terms of learning vocabulary. Using learning media can also increase student interest to be more enthusiastic in learning.

- For other researchers:

It is recommended for future researchers to use this research as information to develop this topic more broadly. In order to motivate student's interests to improving their vocabulary better.
