

## **CHAPTER V**

### **CONCLUSION AND SUGGESTIONS**

In this chapter, the researcher present the conclusion and suggestions based on the data analysis in previous chapter.

#### **A. CONCLUSION**

In this research, the researcher concluded that the result about the effect of Google Docs collaborative writing on students' writing achievement of recount text in the second grade students at SMPN 1 Suruh. The researcher, concluded of this research to answer research question which stated in the chapter I.

In this research, all of the data were calculated by using SPSS 16.0 version for windows. The output of Mann-Witney U Test showed that there was significance different on students writing achievement of recount text who are taught by using Google Docs on collaborative writing. It could be seen on the explaining in chapter IV showed that the mean score of post test in control class of recount text writing was 72.1154. Therefore, the mean scoreof post test in experimental class of recount text writing was 76.3462. It indicated that in writing recount text, the students were taught by using Google Docs had the higher score than the students who were taught by using group investigation. It means that teaching by using Google Docs collaborative writing activity is effective and useful to increase writing achievement.

## **B. SUGGESTIONS**

Based on the result of this research, the researcher would like to give some suggestions for the following parties. They are the English Teachers and the future researcher :

### **1. The English Teacher**

There are many ways to increase students writing ability. And the teacher is hoped to use an appropriate and different method and strategies to create fun learning, so that the students will not easily to get bored or distracted. For future learning , the teacher can use Google Docs as a medium to teach students in learning activity especially in teach students' writing skill because Google Docs can be used for discussion room, especially a mendium to do collaborative writing among students.

### **2. The Future Researcher**

The result of this study is expected to give information for the future researcher who want to conduct similiar research. This research is not yet perfect. The future researchers can cover up the limitation or the lake of this research and give the detail information. Besides that, the next researchers can take the subject of different level such as in senior high school.
