

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presented about the conclusion and suggestion that related with findings and discussion as pretended in the previous chapter of this study.

A. Conclusion

After analyzing the data of this research, the researcher found six moral values based on Linda and Eyre (1997 as cited in Setiawan, 2014). There were bravery, sincerity, honesty, love, self-confidence and strong belief. The researcher also found four morals values based on Taylor and Halstead as cited in Ashari (2004), they were responsible, helping others in need, do not judging others only from their appearances, and polite.

The researcher also found about the important of moral value that can be learned from this movie, they were: a) bravery. Bravery is important to learn because people need bravery to face our fears and overcome the obstacles in our life. . It can conclude that bravery in the movie is important and good for people to learn how to be brave on their life, b) honesty. Honesty is important to learn because without honesty there is no foundation for enjoyable the relationship in any context. Being honest also can improve the relationship and save us from live lie, c) self-confidence. Self-confidence is important to learn because people need to be confident in doing a variety of things for the totality of us in doing something, d) help others in need. Help other in need is so important to learn because humans are social creatures who always need

help from others, e) strong belief. Strong belief is important to learn because it can be the proof for someone that has trusted him or her, f) sincerity. Sincerity is important because it can help to create or build trust to other people, g) do not judge others only from their appearances. It is important because if you want other people polite to you, so do not judge others as far as possible, h) love. Having love is important because humans are very sociable and have close relationships with others, i) responsible. It is important because it can make someone more powerful to show their identity, j) polite. Polite is so important when the people are communicating with others. If one of them is not polite, so the communication will not match and there are many misunderstandings in that communication.

Those moral values in this movie actually remind the audience to be a good person from good characters in the movie and remind the audience that bad people will be losers in the future.

B. Suggestion

Based on the result of this study, the researcher would like to give some suggestions:

1. For the Teacher

The teacher should have good moral when teaching their students. Nurhayati (2018) said that commonly, English college teachers as the main element face many problems such as the students' low motivation to learn, low input, the implicative government textbook, the lack of supporting environment, unsupported school facilities to

eradicate students, the lack of English college teachers who master in instructional technology, uncreative English college teachers, the lack of mastering teaching methods or strategies. From that statement, so, the teacher must be creative to teach the students. For example use movie to improve the students' ability in English. Nurhayati (2016) stated that teachers' limited English proficiency, it means that most of English teachers do not have various technique to teach English, they only conduct traditional teaching technique. Because of that statement the teachers have to be creative. Actually, watch movie also make the students understand about a good things and a bad things. So, it makes the students' knowledge improved.

2. For the Students

Watching movie actually not only make the students know about a good things and bad things, but also the students can improve their English skills, like listening, reading, speaking and writing. So, the researcher hopes that the students should be watching movie when they have a free time to improve their skills.

3. For Other Researcher

The researcher hopes that this study will give advantages for everyone who related with this study. The researcher also hopes that the other researcher can make this study more perfect.
