

CHAPTER V

CONCLUSION AND SUGGESTIONS

This chapter presents the conclusions and suggestions of this study, the conclusions were drawn based on the findings and the discussion in the previous chapter. Meanwhile, the suggestions were based on the conclusions.

A. CONCLUSION

The research conclusion was analyzing of complex sentences in Brothers Grimm's fairytale entitled Two Brothers. In conclusion, the complex sentence types used in the study were three complex sentence types (noun clause, adverbial clause and adjective clause), and the most common complex sentence types used in Two Brothers Fairytale is the complex sentence in the form of adjective clause. There were 120 sentences data of complex sentence in Two Brothers Fairytale, there were adjective clause with 90 data, adverbial clause with 58 data and the last noun clause that 0. From that explanation above the form of complex sentences used in Two Brothers fairytale is adjective and adverbial clause. The dominant types of complex sentence was relative pronoun or adjective clause with 90 data found in the story.

B. SUGGESTIONS

Based on the conclusion there are several suggestions for the future researcher. Considering the importance of understanding the sentence structure especially in the study of syntax, some suggestions are made. It is

also hoped that there are other students who will conduct study on related topic from different angle, hoping that there will be new findings dealing with syntactical study.

1. To the future researcher

For students who are willing to conduct a research on the same topic, it will hopefully give a clear understanding in analyzing complex sentence. It is very important to study linguistic because this subject directs us to discover complex sentence and its uses. It is also hoped that there are other students who will conduct study on related topic from different angle, hoping that there will be new findings dealing with syntactical study. According to the analysis has been done, it was known that in the story there were many sentences that used complex sentences. the researcher relies that she was limited in used the theory, so she just finds several data in this thesis. However, the researcher can conduct and finish this research with the different theory and different data. The researcher hopes that this research could be used as reference for those who are interested in studying syntactical study.
