

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion of the research and suggestions. The suggestions are given to the institution, students, English teacher and future researchers

A. Conclusion

From the discussion on the previous chapter, the researcher describes the conclusion as follows :

There is positive correlation between learning motivation and reading comprehension of the eighth grade students of SMPN 3 Wonomulyo. It can be seen from the result of correlation coefficient value is 0,547 and with ρ -value (0,000) which is lower than α (0,05). It can be concluded that increasing learning motivation will be followed by improving students' reading comprehension.

There is positive correlation between vocabulary mastery and reading comprehension of the eighth grade students of SMPN 3 Wonomulyo. It can be seen from the result of correlation coefficient value is 0,526. Then, ρ -value (0,000) < α (0,05). So, it can be concluded that increasing vocabulary mastery will be followed by improving students' reading comprehension

There is positive correlation between learning motivation and vocabulary mastery toward reading comprehension of the eighth grade students of SMPN 3 Wonomulyo. It can be seen from significant is 0,000. $F_{change} < 0,05$, it can be concluded that the variable correlates. The result of

correlation is $r_{xy} = 0,692$. In conclusion, the increasing of learning motivation and vocabulary mastery are followed by increasing of reading comprehension.

Furthermore, the reseacher concluded that the students should have good vocabulary mastery. The students who have good vocabulary mastery will have better reading comprehension than students who do not. The students who have high skill of vocabulary mastery, they will be easy to understand the text. While students who have low skill of vocabulary mastery, they will get the difficulty to understand the text. Teachers should motivate students for maintaining English learning motivation and improving vocabulary mastery.

B. Suggestion

Based on the explanation and conclusion above, the researcher wants to give some suggestion intended to give some recommendations related to institution, students, teacher and the future researcher. They are as follow:

1. For Institution/School

The suggestion for the school, in this case is SMPN 3 Wonomulyo. The researcher hopes by this research the school will pay more attention to improve and maintenance student's learning motivation and their vocabulay mastery. Because of the high correlation both of them toward student's reading comprehension, the school needs more attention to develop it.

2. For the English Teacher

- a. The level of students' learning motivation should be increased. It can be materialized by giving rewards, appreciating students for doing home work well, creating an enjoyfull process of teaching.
- b. The quality of vocabulary mastery should be improved. It can be materialized by encouraging students to read more books. Reading will add the students' vocabulary. Then the teacher gives assignment which needed vocabulary to use.
- c. The quality of students' reading comprehension should be improved. It can be materialized by giving reading text to the student, then the students given a task to find the topic or theme from the text. It makes the students focus on specific things.

3. For the Students

- a. The students should have the motivation in learning, because it is the first stage to know the knowledge. First step, students can begin for loving the English language by listen to English musics or watching English movies.
- b. The students should develop their mastery of vocabulary because this skill is very important in language learning. Mastering vocabulary will be helpful to avoid misunderstand the meaning of the text.
- c. The students should develop their reading skill since it is important skill that very useful in many things.

4. For the Future Researchers

The researcher realized that the result of this research is far from perfect, but the researcher expects this research will be useful as a reference to their research. Besides that, this research can be used as references to develop similar study.
