

CHAPTER VI

CONCLUSION AND SUGGESTION

This chapter presents deals with the conclusion which is based on the findings and discussion as presented in the preceding chapter. In addition, some suggestions are proposed :

A. Conclusion

According to the discussion about the teacher's strategies in teaching English of using E-Learning at MAN 3 Tulungagung, the researcher can draw the conclusion as follow:

1. After doing the interview and the observation, the researcher found out that strategy that was used by the English teacher in teaching of using E-Learning at MAN 3 Tulungagung, namely independent teaching strategy. For writing skills that strategies use the first is planning, second , drafting and the last editing.
2. Independent teaching strategy in writing skill was used by the English teacher in order to let the students learned the material by themselves. In the other hand, it was also can develop their thinking skills. And teacher as a motivator for students to learn independently.

B. Suggestion

Based on research finding and discussion, the researcher gives some suggestion:

1. For Teachers

This research can improve the quality and creativity of teachers in teaching English e-learning class. Teacher strategies must be applied because this is the teacher's way of determining learning objectives during the teaching and learning process.

2. For students

The students should be aware to keep practice and participate in E-Learning activity. Then, the students also should be more active in improving their ability in the form of education especially in English.

3. For the future researcher

The writer hopes that for future researchers who are interested in conducting similar research, it will contribute to understanding teaching strategies in teaching English e-learning class. Besides, hopefully, this research will provide inspiration and guidance for further researchers to be more careful in conducting research, so that the result are better than this. Therefore, the result of the study will be more worthwhile to be applied in the large area.
