## **B. Discussions**

After analyzing the whole movies based on moral values analysis, the discussion is provided to answer the problems proposed in previous chapter.

“Searching” movie is an Asian-American film directed by Aneesh Chaganty. It released at 2018 by Sony picture. This movie successfully attracted on audience attention because “Searching” movie got reach 8 scores based on IMDB website. This movie taught us about using a social media properly and the relationship between parents and their children. Therefore, the researcher analyzed about moral values found in this movie.

Linda and Eyre (1997) divided the moral values into two types, that are value of being and value of giving. Linda and Eyre (1997) mentioned that “moral value is a result of valuing the process of human values in life”.

It is a significant element in this life because it presents good and bad values through the stories in a movie and contains material to be a lesson that could be implemented in one's life. Applied moral values in our life is important because basically, a good human is who have well manner. Well manner here is about politeness and moral values. Moreover, some of us life with society. The society would kind to us if we have a moral behavior. We can learn about moral values from people's story, environment, own experience, or a show. The show has many kinds such as televisions or movies. The show gives a strong impact towards audiences and daily life.

From the results of analysis, the researcher found that are 7 types of moral values in Searching movie based on Linda and Eyre's theory. The moral values here split into two types, values of being and values of giving. There are 3 types belong to values of being; self-confident, peace of ability, and honesty. Meanwhile 4 types belong to values of giving, there are love and affection, kindness, dependability, and sensitivity.

In values of being, self-confident appears two times, peace of ability appears once times and honesty just appears once times. Meanwhile in values of giving, love and affection appears six times, kindness appears three times, dependability appears once times and sensitivity just appears once times. From these result, it can conclude love and affection is the most dominant types of moral values appears. Moreover, values of giving dominate than values of being in this movie. Overall, the number of moral values found in "Searching" movie is 15 moral values.

Furthermore, there is a correlation between researcher's finding, researcher theory used and previous study researcher used. The correlation is that they have many similarities. First, they analyze the overall moral values both of the value of being and value of giving. Second, there is one type of moral value that dominates in the movie. As in the Life of Pi movie, the type of moral values that dominates is value of being. Meanwhile, in Searching movie, the moral values type dominates is values of giving. The last, both of the researcher and previous studies use Linda and Eyre's theory as a reference for conducting research moral values in a movie.
