ABSTRACT

Thesis entitled "The Influence of Knowledge, Motivation, Return and Risk on the Decision to Become an Investor in the Islamic Capital Market" was written by Anis Watur Rofiah, NIM. 12406173041, supervisor Hj. Amalia Nuril Hidayati, M.Sy. This research is motivated by the phenomenon that the development of the number of customers investing in the Islamic Capital Market is very rapid from year to year. The development of securities companies in attracting investors to invest can be seen from the development of companies in managing funds from investors. Factors that can influence this, such as the level of knowledge, motivation, return and investment risk.

The formulations of the problems in this study are: (1) Is there any influence of knowledge on the decision to become an investor in the Islamic capital market? (2) Is there any influence of motivation on the decision to become an investor in the Islamic capital market? (3) Is there an effect of Return on the decision to become an investor in the Islamic capital market? (4) Is there a risk effect on the decision to become an investor in the Islamic capital market? (5) Is there a joint influence of Knowledge, Motivation, Return and Risk on the decision to become an investor in the Islamic capital market?

This research uses a quantitative approach with associative research type. The sampling technique is using non probability sampling and using convenience sampling. The number of samples used in this study were 30 respondents consisting of customers of PT Reliance Sekuritas Indonesia Tbk Malang. The next stage, the questionnaire data were analyzed using multiple linear regression which serves to prove the research hypothesis using the SPSS 16.0 analysis tool.

The results of this study indicate that partially (1) Knowledge has a positive and significant effect on the decision to become an investor in the Islamic capital market. (2) Motivation has a positive and significant effect on the decision to become an investor in the Islamic capital market. (3) Return has a positive and significant effect on the decision to become an investor in the Islamic capital market. (4) Risk has a negative and significant effect on the decision to become an investor in the Islamic capital market. (5) Together Knowledge, Motivation, Return and Investment Risk have a positive and significant effect on the decision to become an investor in the Islamic capital market. This proves that the decision to become an investor in the Islamic capital market does not only affect these four factors but also other variables.
