

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing and getting the result, the researcher found several moral value in The Pursuit of Happyness movie. The researcher was answered the research problem in this study. The research problem are about the types of moral value in The Pursuit of Happyness movie, and how the moral value are reflected in The Pursuit of Happyness movie. The researcher use Linda and Eyre (1997) statement to analyzing the kind of moral value. The research finding is:

- 1) Moral value that found in the movie there are 22 scene of moral value. There are two kind of value, it is value of being and value of giving. Value of being there are 14 scenes that founded and 8 scenes value of giving. Value of being consists of 1 scene of honesty, 3 scene of courage, 5 scene of peace ability, 3 scene of independent and potential, and 3 scene of self-discipline. The value of giving consists of 1 scene of loyalty, 1 scene of respect, 2 scene of love, 2 scene of kind and friendly, and 2 scene of justice and mercy. From the finding above, this movie more much show the scene of value of being. It show by the main character of Chris Gardner. Meanwhile, this value give to the behavior and treats others.
- 2) From the value that the researcher founded in the movie, the researcher recognize to the student motivation to improve their motivation in learning English. There are 5 point that can improve the student motivation. The first is honesty and courage in the daily activities. It make the student brave to ask about what the missing from their understanding about the material. The second, peace ability with others. This character can motivate students to help each other and have loyalty to others, such as when working in groups. Make easier to study in a group or partner. The third is independent and potential to become the real of them self. It can make

they believe with their potential and they can improve their potential step by step. The fourth is respect with each other. It start to make the students have a good relationship with other, as with their friends or teacher. With a good relationship that make they more comfortable to advise each other and share something. The last is self-discipline and moderation in all activities (especially in studying English). Start from come to the class on time. It can make student can follow the material explanation clearly and they can ask any question about the material missing in their understanding. Make them more powerful in studying and not bored in learning process.

That's all the result of the analysis obtained by the researcher regarding moral values and some values that can motivate student in English learning.

B. Suggestion

Based on the result of the research that has been described, the researcher would like to give some suggestions to the following:

1. For Parent

The result of this study can help the parents to manage the children's moral value in their daily activities. I wish parents could pay more attention to what they watch at home. Because this will affect what they will do in their lives. Especially regarding their moral education which needs to be directed from an early age. In addition to paying attention to what they are doing, I hope parents can also motivate them in their studies so that they can be more optimal.

2. For student

The result of this study can help the student to learn about moral value from the movie that they watch. Besides being able to improve their English skills, it also become some addition to their knowledge of moral values. Because not all moral values are taught in school. This will be

the basis for them to interact with the environment, as family and school. In addition, they also assess which moral values are good and bad that can sort them out for them to apply in their environment

3. For the other researcher

This study can be used as a reference in analysis movie, especially in moral value. It is much better if the next researcher looks for the moral value according to several other experts. So that they can compare or find differences in each expert who can clarify the role of moral values in everyday life.
