

CHAPTER VI

CONCLUSION AND SUGGESTION

This chapter presented the conclusion and the suggestions. The conclusion was presented based on the findings and discussion in the previous chapter. The suggestions were given in order to help the practice of teaching English in Kumon Course Tulungagung.

6.1. CONCLUSION

Based on the results of interviews, observations, and documentation that have been discussed in the findings and discussion sections, researchers can conclude that Kumon Course Tulungagung is an educational institution in the form of a franchise. Everything that is needed in the process of learning English has been arranged and provided by Kumon Center. This equalization is done to maintain the quality of each Kumon branch that is spread throughout Indonesia.

English learning in Kumon Course Tulungagung prioritizes students' mastery of reading, listening, and speaking skills. In its fulfillment it is appropriate if Kumon Course Tulungagung uses a learning strategy in the form of student centered. In addition, with teaching strategies that emphasize self-learning, students will better master the material. The media used have also been chosen very precisely in the form of CDs, worksheets, and textbooks which will greatly facilitate student learning. by providing material according to student abilities and accompanied by a gradual learning evaluation system at each level will also be able to very accurately measure the extent to which students have

mastered the learning material in English

6.2. SUGGESTION

Some suggestions were made to follow up the findings which were added to the tutor of EFL class and the chief of Kumon Course Tulungagung, and other researcher.

1. For the tutor of EFL class and the chief of Kumon Course Tulungagung

To EFL class tutors and chief of Kumon Course Tulungagung to be able to provide more assistance to students when students work on worksheets. Can provide more time for providing feedback or review at each meeting with students.

2. For other researchers

The suggestion for other researchers is to make this research an inspiration for further research.
