

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

This chapter will present the conclusion and suggestion based on the data which is found in chapter previous chapter.

#### **A. Conclusion**

Based on research problem and hypothesis proposed and also the result of data analysis hypothesis testing, so some conclusions are down as follows:

1. Students' reading ability at the second year of SMPN 1 Sumbergempol in academic year 2014/2015 in reading narrative text when they are taught before using summarization technique is know based on the achievement of pre-test in that the men of 32 students' score is 72.12.
2. Students' reading ability at the second year of SMPN 1 Sumbergempol in academic year 2014/2015 in reading narrative text when they are taught after using summarization technique is better than they are taught before using summarization technique it was know from the achievement of post-test in that the mean of 32 students' score is 80.19.
3. Based on the research finding it can be concluded that there is significant influence of using summarization technique in teaching narrative text of reading ability on students of the second years at SMPN 1 Sumbergempol Tulungagung. It also means that there is different score to the students before they are taught using summarization technique and the students

after they are taught using summarization technique. This conclusion is gotten from analyzing the result of statistical test by using t test shows that the  $t_{count}$  is bigger than  $t_{table}$  at the significant level 0,05. It can be inferred that the summarization technique is effective to conduct teaching reading, especially in narrative text.

## **B. Suggestions**

From the research the researcher recommended some suggestions whether there is any significant effect of using summarization technique in narrative text of reading ability of the second year as follow:

### 1. For the English Teacher

Based on the result of study that the summarization technique is effective in reading ability. It is suggested to the English teacher to use summarization technique in order to make the students easier understand the reading text, especially understand about the main idea and they can summary the text well.

### 2. For the students

The researcher recommended for the students to use summarization technique when they are learning about narrative text in reading ability, because it was proved that by using summarization technique, the students could understand about the text more easily and also could make the students practice to re-telling or rewrite what they read.

### 3. For future researcher

It is hoped that this research could be conduct as a reference to other research in the similar area or others.
