CHAPTER VI

CONCLUSION AND SUGGESTION

This chapter presents the conclusion and provides the suggestion concerning on analysis the language style that used in "Mulan" movie.

A. Conclusion

From the study, the researcher found that there is five language style that used in the "Mulan" movie. There are frozen, formal, consultative, casual, and colloquial styles. The frozen style is commonly used in formal and symbolic situations, a figure that used this style is commonly used by important characters, and in this movie, the frozen style is used in the palace. Next, a formal style is commonly used by the figure in the formal meeting which is the audience usually answers with no interruption, and the pronunciation that is used is also clear. After that, consultative style is used in the semiformal situation which is this style commonly used by family and talking about the relax topic. And there is the casual style which is this style commonly used by the figure in the conversation with their friend and they commonly used jokes to this conversation. The last style was found in the colloquial style. This style informal situation and usually the figure used construction in their conversation.

From the explanation above, the five language styles that were found have different characteristics and the figure used different language styles in different situations. It indicates that the way you communicate in everyday life

is crucial because people need to communicate with other people in life and used language to share their information. The role of language style is to give choice to people who used many types of language styles based on the situation that happens.

B. Suggestion

In this study, the researcher focuses on the analysis language style in the "Mulan" movie by Niki Caro. The researcher found five types of language styles, there are frozen, formal. Consultative, casual, and colloquial style. The found of research will be advantages to other researchers which it can use to support their research about analysis of language style. And then, this research can advantage to university students which can give knowledge about language style which is can be found in this research then after they read the study the researcher expected that the university student can understand more about language style that can be gotten in this data. The writer argues that linguistic theory can be implemented to help people learn and grow language style analysis. From this, the researcher suggests for the next researcher can analyze the language style in the magazine, newspaper, or advertisement or with the same study but with new development in giving information about language style.
