CHAPTER VI

CONCLUSIONS AND SUGGESTIONS

This chapter consists of two parts, the first part of which is dealt with conclusions about the findings of the study and the other deals with suggestions

1. Conclusion

Based on the findings and discussions in the previous chapter, the researchers draw the following conclusion: Students' perception of the use of e-Learning as an online learning of English subjects in grade VII students in MTsN 2 Kota Kediri has the perception that online learning lacks an understanding of the materials that have been delivered by teachers. Online learning using e-Learning creates negative perceptions for students. Because students prefer to learn directly with the explanation given by the teacher directly

2. Suggestions

From the findings presented in chapter four, there are a number of suggestions as follows:

   a. The government is expected to be able to implement effective learning techniques and supported by adequate infrastructure such as good networks, mobile phones that support applications from online learning and so on.

   b. Students should improve their knowledge in the online learning process and better understand the media used by teachers

c. The results of this study can be used as a reference for other researchers online learning because this study focuses on the perception of online learning using interview research instruments.
