

CHAPTER VI

CONCLUSSION AND SUGGESTION

In this chapter, the researcher presents the conclusion and provides suggestion concerning on analyzing the educational value from The Peanut ButterFalcon Movie.

A. Conclusion

After data analyzing, the next step is draw conclusions. The conclusion itself is based on research question from chapter one. The findings of this research proved that there are 11 educational values found in “The Peanut Butter Falcon” movie, those were religiousity, honesty, hard working, creativity, curiosity, loving homeland, appreciating achievement, communicative, peace, social sensitivity and responsibility and the most dominant educational values found in the movie is social sensitivity. The 11 educational values that found are match with the Indonesian culture there are contain religious, social, and nationalism. The result of educational values have a similar purpose that is make the audience understand the good norm to each other (social), God (religious), and homeland (nasionalism). Beside that, with watching movie the students can develop their listening and speaking skills and also expand vocabularies.

B. Suggestion

Based on the result of the study, there are several suggestions that aimed for the teachers, students, and the future researchers who are willing to conduct a research on the similar topic.

1. For the teachers, it is helpful to use movies as educational media in order to develop students' skills and character through the educational value found in the movie. Although this film is about wrestling, it can be used as a teaching tool if the teacher can process and determine the exact value for the student. It is hoped that the findings of this study will inspire teachers to be more creative and enthusiastic about teaching their students.
2. For the students, it is hoped that they will understand and receive several the educational values presented in the film. In addition, they can improve their skills such as listening, speaking and expand vocabulary. As a result, they can apply it in their daily lives.
3. This study is also aimed to be a reference for the future researchers who decide to conduct the study in the similar topic. The researcher is also hoped to the next researcher can develop the study that related to the topic. The researcher is a common human being, it means that he can make a mistakes in the research. Thus, if there is other researcher to develop the research, researcher will give the freedom on it.
