

## CHAPTER V

### CONCLUSION AND SUGGESTIONS

This chapter present the conclusions and suggestions derivied from the result of the discussion in the previous chapter. The conclusion is drawn based on the result of the research. Meanwhile, the suggestions is addressed to the teacher and the future researchers who have the same research focus.

#### A. Conclusions

The conclusion in this research entitled “The Effectiveness Of Using Video Material Via Zoom Meeting Application In Learning Listening at Man Kota Blitar” was accepted based on the result of using video material via zoom cloud meeting application in learning listening of tenth grade students at MAN KOTA Blitar. The use of this application is to helps the teacher and students to carried out online learning well during the covid-19 pandemic. The implementation of this application is to make the students more attract to be active in teaching and learning activities. Therefore the use of this application can minimize the monotonous way in teaching and learning activities in particular online english learning.

The participant of this research were tenth grade students of MAN KOTA Blitar. According to the result of analyzed data, can be conclude that the implementation of the used of video material via zoom cloud meeting application in learning listening there was any significant different score between students’ listening achievement before being taught and after being taught by using video material via zoom cloud meeting application. Based on

the result of calculation on SPSS 23.0 it shows that significant value is smaller than significant level ( $0,000 < 0,050$ ). It means the alternative hypothesis ( $H_a$ ) was accepted and null hypothesis ( $H_0$ ) was rejected. So it can be concluded that the used of video material via zoom cloud meeting application in learning listening was effective.

## **B. Suggestions**

From the conclusion above, there are some suggestions that are proposed by the researcher :

### 1. English Teachers

The researcher suggest the english teacher to use video material via zoom cloud meeting application as an alternative way to carrying out online teaching and learning process. This application can helps the teachers to deliver learning material well mainly in online teaching and learning activity. Moreover, this application also helps the teacher to ensure the students that learning process carefully so that the students' could improved listening achievement well.

### 2. Future Researchers

This is expected for the next researcher, this research is still not perfect. This research was limited in learning listening. So that for the future researcher may can develop this research in another case. Besides, the future researcher can use this research as reference to support some source their needed.
