

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the data presented in the previous chapters, the researcher concludes that the students' interest in learning vocabulary at the fourth semester of English Department of IAIN Tulungagung is High. It means that Twitter is interesting for students in the learning process. Twitter can be used as an alternative media for learning. This can be proven from the facts or data that show the level of the students' interest is high, the types of interests that the students have, there are several factors that affect students' interest in learning vocabulary through twitter and there are several types of vocabulary that they are interested in. It also does not forget supported by the role between teachers and students. How teachers assist students in the learning process and the role of teachers and students must be able to use each other's media properly and correctly.

B. Suggestion

Based on the results of research and data analysis, there are several things that the researcher conveys, especially related to students' interest in learning vocabulary through Twitter, so the following suggestions are submitted:

1. For teachers

The researcher wants to convey that the teacher must always provide motivation and encouragement for students so that students still have a sense and have an interest to always enthusiasm for learning.

Teachers must also use this media to teach but the teacher must supervise their students, so that the students are not to misuse it's media when in learning process.

2. For the next researcher

The researcher said that for the next researchers to be able to examine other variables besides interest in learning with other media that more sophisticated, interesting and more up-to-date media besides twitter.
