

CHAPTER V

CONCLUSION AND SUGGESTIONS

In this chapter, the researcher presents the conclusion and suggestion of the research. The conclusion is based on the presentation and description of the findings and discussions from the data analysis. The suggestion in this part is addressed to the English teacher and the other researchers who have same consideration.

A. Conclusions

The conclusion in this study entitle “the effectiveness of Quizizz application towards students’ grammar understanding” was taken based on the result of using Quizizz application towards students’ grammar understanding among the eighth graders at SMPN 1 Sumbergempol. The participants in this study are class VIII B. According to the data analysis the results of this study, it can be concluded that there is a significant difference in the scores of students before and after being taught by using Quizizz application. The results statistics show that there is a significant difference between the scores of the pre-test and the post-test. The students’ grammar understanding before being taught by using Quizizz application is generally low. The mean pre-test score is 63.50. Then, the students' grammar understanding after being taught by using Quizizz application is better than before. The mean post-test score was 72.50. From the results of the above data, the mean score of the pre-test is lower than the mean score of the post-test. Finally, related with the explanation above, it means that the Null

Hypothesis (H_0) is rejected and then the Alternative Hypothesis (H_1) is accepted. It can be seen from the significant value. In this study, the significant value was 0.000 divided by 2 equal to 0 and it was smaller than $\alpha = 0.05$. So, the Quizizz application is very effectively used as a teaching media. This application is very well used to support the online teaching and learning process. This media is also very suitable for use in learning grammar, because by using teaching media, learning grammar will be easier for students to understand. In addition, media will have an impact on students because this media can also increase interest, motivation, competitiveness and students' understanding in understanding material, especially in grammar.

B. Suggestions

Based on the findings related to the result of the effectiveness of Quizizz application towards students' grammar understanding among the eighth graders at SMPN 1 Sumbergempol, then the following suggestion was suggested:

1. For the English Teacher

Based on the result from this research, the English teacher should implement or develop Quizizz application as the teaching media or alternative way in teaching grammar. This teaching media is also very suitable used during the Covid-19 Pandemic as now. It is used in the distance learning process or online so that facilitate the learning process between the teacher and the students. By using this media, the student can improve their ability in grammar and can motivate their daily activities in study. Besides that, this application also can be used by teacher in carry out assessment in the learning.

2. For the Other Researchers

For the other researchers who have same consideration, this teaching media is very interesting to implement or to develop, because this teaching media is effectively to be applied in teaching learning process. Besides that, this research can be used as one of references for other researchers who want to stage the similar research.
