

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter the writer would like to write the conclusion and suggestion based on the result of the analysis on the lyrics of Disney's selected soundtracks movie.

A. Conclusion

Based on the findings presented in chapter IV, the authors obtained the following conclusions:

This discussion describes the data found and analyzed by researchers in the previous chapter. In addition, this discussion also answers the researcher's questions in chapter one. First, this discussion discusses types of figurative language. Second, it describes the figurative language used in the song lyrics of the Disney soundtrack. After conducting the analysis, the researcher found several types and described the figurative language used in the song lyrics. There are several types of figurative language used in songs such as Thirteen Hyperbole, five Personification, seven simile, two metaphor, two symbol and one Paradox.

Every lyrics written must have a message aimed at both the listener and the reader. The message was directed with the intention that they would get an impression after listening to and reading the lyrics. Based on this theory, "messages are the things that singers want to convey to listeners and readers through their songs". Thus, the message contained in Disney's lyrics

is indirectly conveyed to listeners and readers through the lyrics they write. We can find the lyric message after we know the meaning contained in it.

The lyrics of Disney's selected songs try to tell stories about human life which contain about love, sadness, happiness, passion and others. In Disney's selected song lyrics that contain figurative language is very helpful in understanding the song. The existence of figurative language is not to make it difficult to understand lyrics but to simplify and clarify understanding of lyrics. Song is perfect for English Learners who want to improve their English skills in analyzing lyrics that contain figurative language. From the description above, it can be concluded that in analyzing the lyrics in addition to finding figurative language in the lyrics, we can also understand the meaning of the song which contains figurative language and the message of the song.

B. Suggestion

Regarding the results of analyzing Disney's song lyrics, the thesis writer has three goals and suggestions for song listeners and future researchers.

1. Suggestion for students

The student should be open mind that English is very important. Moreover, study about figurative language that usually used in song, poem, etc. The using figurative languages is to make the song, poem or

our daily speaking more interesting not only in listening but also in reading and writing.

2. Suggestion for the teacher

Related to the contribution to the English teacher, it is hoped that this study can be a complement for other literary studies especially about figurative languages, when teaching listening, writing and reading.

3. Suggestions for researchers

The author has several suggestions related to research subjects for future researchers, because my research study is actually still far from perfect, so it can be continued. In addition, researchers must master English in conducting research to get more research benefits. In addition, these learning outcomes can contribute to others and benefit everyone who wants to learn about life through works of art.
