

CHAPTER V

CONCLUSION AND SUGGESTIONS

This chapter presents the conclusions and the suggestions derived from the result of the study and discussion in previous section. Meanwhile, the suggestion is addressed to the teacher and the future researchers who have the same concern with this study.

A. Conclusion

Based on the results of the data analysis and research findings it can be concluded that there was any significant different mean score of the students before and after being taught by using Instagram vlog. It also proves the mean score gain is statistically significant. Thus the students' quality in speaking skills before being taught by Instagram vlog was generally low and it can be then increased by the Instagram vlog. This conclusive proposition is probably true to the extent of 95% confidence. However, it contains chance of error as much as 5%. Instagram vlogs are a new method and everyone has the application. By often practicing using Instagram vlogs could help students be creative in speaking. From the result, it can be concluded that Instagram vlog in teaching speaking skills is effective to be used as teaching media and learning sources at MTs Imam Al Ghozali Tulungagung

B. Suggestions

From the conclusion above, there are some suggestions that are proposed by the researcher:

1. For the English Teacher

Based on the result of this research, the English teacher should implement Instagram vlog as the alternative teaching media or teaching material especially to increase students' speaking skills.

2. For the Students

The researcher expects that the students at the eight grade of MTs Imam Al Ghozali become more active and confidence in English class, especially when the researcher applies the Instagram Vlog. By using this application, they not be afraid to explore their creativity and knowledge. Moreover, the school facilities them by Wi-Fi which is useful for helping the teaching learning process. Thus, the students should be improving their confidence in order to increase their speaking.

3. For the Future Researcher

It is better to have confidence in speaking habit today. By this research, the researcher hopes the result of this research can give many advantages to the reader, the teacher, the students, and researcher herself.
