FORM EVALUASI REVIEWER:

Reviewer	Title of the manuscript
	Religious Moderation in an Eastern Javanese Town

No.	Item	comment
1.	Kejelasan	good
2.	Novelty	The author through this article must clarify the positioning of his study compared to previous similar studies
3.	Logical Reasoning	Enough
4.	Efektifitas Judul	Effective
5.	Abstract (including keywords)	Abstract must be clearly stated methodology and data analysis used by the author
6.	Ketaatan Mengikuti Author guideline	The introduction is engaging, accomplishing the difficult task of framing the global phenomenon of Islamophobia while quickly narrowing the scope to the focus of the article . In this section, as I remark in the marginal comments, my main suggestion is that you need to more confidently assert the first half of your argument in the final paragraph. I might also briefly (even in just a sentence or too) note the other religions that coexist with Islam.

		<p>In writing sources or references the author has not fully following the author's guidelines, please follow the guidelines. This article can be published with a note that the author must make revisions according to the review notes, which can be seen in more detail in the manuscript</p> <p>Compelling, clear writing style and narrative; however, I did go through the paper with track changes and comments to highlight or change some unclear phrases</p>
