Susanto susanto:

We have reached a decision regarding your submission to Sport Science and Health, "Traditional Sport-Based Physical Education Learning Model in Character Improvement and Critical Thinking of Elementary School Students".

Our decision is to: Request Revisions

Dear Authors,

The new edition does not take into account the requirements of the reviewer:

"The INTRODUCTION section needs editing. The section lacks an analysis of the research results regarding the chosen topic. See the DISCUSSION section.

**Ethical oversight.** The manuscripts must refer to the materials containing the approval of the research by the Ethics Committee of the university hosting the research. Authors should include a statement in the manuscript that informed consent was obtained for experimentation with human subjects. The privacy rights of human subjects must always be observed.

References should be in APA style and **listed in the order of appearance of the citations** and not numbered."

In addition, Table 1 is redundant in the section INTRODUCTION. The material referred to in Table 1 refers more to the MATERIALS AND METHODS section. In the introduction section, as a rule, illustrative material is not provided.
