Kepada: [iffatinnur@gmail.com](mailto:iffatinnur@gmail.com)

Dear Iffatin Nur, Munardji, Ahmad Zainal Abidin, Syamsul Umam,

This is with reference to your manuscript entitled “Coastal Reclamation in the Frame of Islamic Perspective of Maqāṣid Sharī’ah to Preserve Environmental Sustainability” submitted for publication in the International Journal of Pharmaceutical Research. It is my pleasure to inform you that the referees have suggested to accept your manuscript after some minor revision.

You are required to revise your manuscript according to the referees’ comments below and highlight the changes, in addition to these comments also please have a look at Editorial Requirements at ‘Authors Guidelines’ particularly in term of reference section when revising your manuscript. We greatly anticipate submission of your revised manuscript (in MS-Word or LaTeX) in a week.

The attached enclosed files have been reviewed. Please send your revised manuscript as suggested by the reviewers.

Please make sure to send your response to the reviewer’s comments in a separate word file. You are requested to kindly confirm a safe receipt of the message and don’t hesitate to contact us if you have any additional query/concern.

Looking forward to hear from you at your earliest possible.

Reviewer comments 1:

1. Abstract does not include the purpose, focus, method, and study conclusions
2. The introduction does not specifically discuss the focus of the study, goals and objectives.
3. The method does not mention the number of informants, how it was obtained, where to be interviewed, and how the data analysis techniques were to obtain conclusions.
4. In the result subtitle, I did not find field data, specific discussions, and novelty that led to conclusions. Please describe it well. Then, there are lots of quotes in the results.
5. The conclusion is not specific. This is because the common thread between introduction and method is not well intertwined.

Reviewer comments 2:

1. Explain research purpose, method and result in abstract
2. Explain why you used this method
3. Articles must contain Introduction, literature review, method, result discussion and conclusion
4. Add respondent profile
5. Add table explanation/description about 1 paragraph
6. Add research purpose in introduction, add more citation and references from international journals in introduction
7. Explain your research method, add literature review, method, result and discussion, add more references in discussion
8. Compare your research with international journal research

Sincerely yours,

Editor-in-Chief
