CHAPTER V

CONCLUSIONS AND SUGGESTIONS

This chapter explained some conclusions and suggestions clearly based on the research finding and discussion in the previous chapter.

A. Conclusions

Conclusion means answering the research problem. Based on the result of this research, it can be concluded that Make a Match technique was very effective in teaching vocabulary and was proved as follow:

1. The administration of pre-test to know the students' vocabulary achievement before being taught by using Make a Match technique showed that the mean score was 84.56.

2. The administration of post-test to know the students' vocabulary achievement after being taught by using Make a Match technique showed that the mean score was 91.30.

3. There was significant difference of students' score before being taught using Make a Match technique and after being taught using Make a Match technique. It was known after analyzing by using SPSS 16. The result of analyzing showed that T-test score was 3.315 while the T-table was 2.021. It means that T-test score was higher than T-table. In other words, Make a Match technique was effective to be used in teaching vocabulary for first grade of junior high school.

B. Suggestions

Based on the conclusion, there some suggestions which were addressed for the following people below:

1. The Teacher

   The teacher may use Make a Match technique in teaching and learning activities, especially in teaching vocabulary. This technique could help students learn and memorize some vocabularies in a pleasant way. The students also could build their confidence because they worked in group.

2. The Next Researcher

   The researcher could use this research as previous study. The result of this study can be used by next researcher as supporting of their research. This research just focus on noun in part of house, the next researcher can expand the material not only in noun as a topic.
