Language is the key to communicate with other people. A good communication is the communication that is clear, precise and understandable. Communication is simply the act of transferring information from one place to another, whether that is orally or written. In educational setting, a good communication is needed and the used of code switching becomes a common phenomenon when they are involved in English teaching and learning program. The teacher can use English first and then switch to Indonesian to explain more about the material in explaining material. This way maybe able to help the learner in understanding the material and enhance the students' enthusiasm in improving their English ability.
