

CHAPTER V

THE CONCLUSIONS AND SUGGESTIONS

This chapter discusses about conclusion and suggestion on the basis research findings and discussion presented in the previous chapter.

A. The Conclusions of the Study

After all the data were analyzed accurately based on the research findings, the researcher can write some conclusion. The implementation of *PQRST (Priview, Question, Read, Summary, Test) technique* in the reading comprehension in narrative text at the Eight grade of MTsN Jambewangi from cycle 1 to cycle 2 improved not only on the students' reading narrative text but also on the students' motivation in reading process. The criteria had not been achieved yet in cycle 1 because there were only 46% of students (13 students) who passed in the test in cycle 1, but the criteria of success which was 75% of the students with score ≥ 75 had been achieved in cycle 2 because there were 80% of students (29 students) who passed the test in the cycle 2.

The students' responses were good. It is according the questionnaire and interview that the use of *PQRST (Priview, Question, Read, Summary, Test) technique* was really interesting and help them in the comprehending a reading in narrative text well. In addition, there are strengths when *PQRST (Priview, Question, Read, Summary, Test) technique* is applied in teaching reading: Firstly, the technique enables the students to set their own purposes

in reading narrative text. For increasing and developing instructional strategy, the writer gives suggestions to:

1. The English Teachers

The English teacher in junior high school should give attention to the English subject, especially in comprehending reading text. In teaching reading, the teachers should select the good technique and strategy to motivate the students in learning reading.

2. The Students

The students should have a good motivation and should be more active to learn English especially reading. They also have to participate well in the class so that their ability to comprehending reading can improve maximally.

3. Other Researchers

The researcher realizes that there are many weaknesses in this research. However, the researcher still expects that the other researchers can use this research as a reference to conduct the further research.
