Keywords: Brand Image, Digital Marketing, E-WOM, Islamic Branding, Purchasing Decisions

This research is motivated by the successful sales of Emina cosmetics as evidenced by the inclusion of Emina cosmetics in the 7 cosmetic products most chosen by consumers, including the top 10 products with the most sales in e-commerce (Shopee and Tokopedia) and being the only cosmetic brand that received an award from the MMA Smarties Global Awards in 2022. Emina Cosmetics targets teenage consumers, where these teenage consumers belong to Generation Z. This research aims to examine the role of brand image in intervening in the influence of Islamic branding, e-WOM, and digital marketing on purchasing decisions. The independent variables of this research are Islamic branding, e-WOM, and digital marketing. The intervening variable is brand image, and the dependent variable is purchasing decisions.

The research method used is a quantitative approach with an associative type. Research data was collected through distributing questionnaires and measured using a Likert scale. The sample was determined using a non-probability sampling technique, purposive sampling, and 250 samples were collected. The collected research data was tested by research instruments, classical assumption test, F test, coefficient of determination test, path analysis, and hypothesis test with the help of the SPSS 26 statistical test tool and the Sobel test calculator.

The results of the research show that Islamic branding has a significant positive effect on purchasing decisions, e-WOM has an insignificant negative effect on purchasing decisions, digital marketing has a significant positive effect on purchasing decisions, brand image has a significant positive effect on purchasing decisions, brand image can intervene in the influence of Islamic branding on purchasing decisions, brand image can intervene in the influence of e-WOM on purchasing decisions, brand image can intervene in the influence of digital marketing on purchasing decisions.

The practical implication of this research is that companies must act quickly to overcome e-WOM so that it can have an effective influence in increasing sales. E-WOM can be improved by improving sales services, collaborating with content creators to review products, building online communities, and holding events encouraging consumers to share their best experiences using Emina cosmetic products. This needs to be done to increase the number and quality of reviews regarding Emina cosmetics both on social media and shopping platforms so that potential consumers feel they are taking the right steps by making a purchase.
