

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher presents the conclusion and the suggestion from this study.

A. Conclusion

After conducted this study, the researcher draws some conclusion base on the discussion. The conclusions are first, the average of students' score of pretest (teaching vocabulary before using comic) was 51.88. Second, the average of posttest's score (teaching vocabulary after using comic) was 83.32. Third, there was difference in vocabulary score before and after students were taught using comic as a teaching media. It was showed of the mean of posttest score was higher than pretest score ($83.32 > 51.88$).

Moreover, the test of hypothesis using t-test that was calculated by using SPSS 16.0 version showed the value of t-test was higher than the value of t-table. The value of t-test was 11.452, while the value of t-table on $\alpha=0.05$ was 1.710 ($11.452 > 1.710$). So, the null hypothesis (H_0) was rejected and the alternative hypothesis (H_a) was accepted, that H_a is there is any significant difference on the students' vocabulary achievement before and after being taught using comic as a media for the seventh-grade students of SMP Al-Kamal. This meant that using comic as a teaching media is effective in teaching vocabulary at junior high school especially for the seventh grade SMP Al-Kamal.

B. Suggestion

Base on the above conclusion, the researcher presents some suggestions for:

1. The English teachers, especially in teaching vocabulary in Junior High School, to use comic as a media because it's effective when applied in Junior High School to teach vocabulary. And teachers must make the teaching activities as interesting as possible in order to make the students will not get bored and can get all the material. If the teacher just asks students to read the comic without other activities, students will be bored. Teacher can combine comic with other activities such as game, quiz and so on. Besides,
2. The students in vocabulary class should pay attention to the teacher's explanation and instruction. In addition, the students can use the result of the study as suggestion or idea of learning that is to increase their vocabulary mastery
3. And for the further researcher, it is expected that the result of this study can be used as reference to conduct a further research that is related with comic as media.
