

## CHAPTER VI

### CONCLUSION AND SUGGESTION

This is the last chapter. This chapter consists of conclusion and suggestion. The conclusions conclude from data of observation, the suggestion is intended to give the information for the next research which interested on similar research.

#### A. Conclusion

Based on the result of data, researcher concludes that:

1. Type of code switching founded are:
  - a. Intra-sentential switching: The researcher found this type of code switching through findings the data result 21 times.
  - b. Enter-sentential switching: the researcher found this type of code switching through findings the data result 5 times.
  - c. Extra-sentential switching: the researcher found this type of code switching through findings the data result 5 times.

#### B. Suggestion

Based on findings, the researcher found some suggestion which useful for students, teachers, and the next researcher.

1. For students

Because students have problems like lack of vocabularies, switching the language is alternative way. Switching the language make the students add more vocabularies.

2. For Teachers

Switching the language is interesting enough to make students aware about English and students catch up the meaning easily. It can be a way for teachers to teach English and make the students understand what teacher means.

3. For the next researcher

Because this research has much leakage, the next researcher can input more kind/type/factor/reason why code switching used in learning class environment. This study is not perfect without the complement for other researcher.
