

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter is aimed to state the result of analysis of the study. It includes both conclusion and suggestion.

#### A. Conclusion

After discussing the result of analysis, there are 11 utterances flout the maxim of quality, 98 utterances flout the maxim of quantity, 52 utterances flout the maxim of relevance and 39 utterances flout the maxim of manner. The total of the utterances which flout the maxim are 200 which means they generate 200 implicature in the dialogue Forrest Gump movie. The writer concludes that the speaker flouts maxim of quality when the speaker thinks about terrible thing and say the opposite of what we think. Then the speaker flouts the maxim of quantity when speaker tries to present funny fantasies as if they were facts and also when the speaker wants to trigger the hearer to be responsive and sensitive about situation on him/herself. The speaker breaks maxim of manner to when he/she responds to the participant's statement with vague of confusing response. The speaker flout maxim of relevance when he/she means to trigger someone to introspect about certain phenomena.

The speaker gives hints such like pervious event and general fact that is not relevance with the subject of talks at that time of speaking, but they actually correlate with the recent situation of someone because they are the factors that determine the situation and condition of someone at that time of talk. The speaker flouts the maxim of manner when the speaker tells the most prepared truth.

Implicature is just like a bridge that connects what utterance that being said and what is in speaker mind. Implicature is the one effective way to conveying message because the speaker does not need to give long statement to express the speaker's idea or thought. The speaker needs to give little statement which contains the hints which correlate with certain aspect of situation and hearer's knowledge. So hearer can extract the implied meaning which reflects the idea of the speaker.

The writer also found the frequency is particular type of maxim in dialogue of Forrest Gump movie. There are 5.5% flout the maxim of quality, 49% flout the maxim of quantity, 26% flout the maxim of relevance and 19.5% flout the maxim of manner. The maxim of quantity is often flouted by the speaker. And the categories  $S_{+pw} = H_{+pw}$ , +S of every type of maxim has the highest flouting frequency than another categories.

**B. Suggestion**

The writer expects this research can enrich the reader's knowledge about the concept of conversational implicature. The writer intends to explain that everything around us can become the subject of research. Entertainment is one thing around us which is not only has a function of entertaining but it also become the subject of research. The writer expects that the reader who will become the next research will be able to apply the theory of conversational implicature in different object like newspaper, TV show, advertisement, debate and many others. The writer also expects the next researcher to improve in term of implicature study by using different theory such like theory of relevance.
