

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

Based on the research that was carried out in MTs Darul Huda in the academic year of 2015/2016, the writer drew conclusion from the previous chapter which had been discussed.

1. Parents' education level background at the seventh grade students of MTs Darul Huda in the academic year of 2015/2016 was considered medium category. It can be seen from the average value of parent's education level background was 57; it is on the interval 57 – 70.
2. The average value of student's achievement in English learning was 75. So, the English learning achievement at the seventh grade students of MTs Darul Huda in the academic year of 2015/2016 was categorized good.
3. In this research, it was found that there was significant correlation and significant influence between parent's education level background and student's English learning achievement. It could be seen from correlation result that the $r_{\text{count}} 0,574$ and $F_{\text{reg}} 18,663$. However this correlation and the influence were enough, which pointed to other factors influencing students English learning achievement.

B. Suggestions

From the calculation above, there are some suggestions that are proposed by the writer:

1. For parent

Parent should give attention to their children's achievement by giving good guidance about the good way in learning. They also should give attention continuously toward children's time in learning and build children's consciousness on the important of learning as a necessity. For parent that from higher education who have a lot of discourse and knowledge, they can accustom their children to communicate using English in their home.

2. For teacher

Teacher should control the development of the students' achievement in order to know the students who have less achievement, so they can do the remedial test

3. For student

Students should make learning as a necessity. They have not to be controlled continuously by their parent but with their own consciousness, they use the time to study in order to develop their achievement.

4. For next researcher

The writer suggests next researcher to conduct further study that can enhance this research because this research actually can be broaden and extended to other subject and in different setting.
