

CHAPTER IV

RESEARCH FINDINGS AND DISCUSSIONS

In this chapter presents about research findings and discussion of the data. The presented data are these related to the proposed resence questions, covering : (1) the types of Indonesian- English code-switching used in the sentences of the novel *Negeri 5 Menara*. (2) frequency of types Code-Switching in the sentences in the novel *Negeri 5 Menara*. (3) speaker's motivations of using Code-switching by the characters of the novel of *Negeri 5 Menara*. They are than analyzed and classified based on the discussed in Chapter III.

A. Findings on types of code switching in the dialog at the novel *Negeri 5 Menara* by A.Fuadi.

The types of code switching used in the novel *Negeri 5 Menara* by A. Fuadi are found follow :

- | | | |
|-------|-------------------------|--|

In all data this type is intra-sentential switching. In every sentence occurs switch in the sentence, a clause or sentence boundary and in sentence with no change of situation. In this sentence occurs change Arabic word and English word for make familiar with both languages and both language used in the Pondok Madani in every day,

(Raja : “Bukan suluk, tapi shundug, pakai shad’ jawab raja dengan tajwid yang sangat fasih.(30) ; Bagian keamanan :”Kalian kami angkat sebagai jasus (36). And, in this sentence occurs change dialect because the people using habitually word in daily activity.

Ayah : “Ayah bertanya pada kakek, “ kita naik apa tadi nambo. ” Kata nambo-nya, “kita naik inyiak. ” (103))

b). Inter-sentential switches

The second type of Code switching is inter-sentential switches . As term indicates, the switch involves movement from one language to the other between sentences.

[6] Pak etek muncak : “Alah kanai lo baliak. Kita kena lagi!”(10)

That data appears the changing of pak entek muncak said to several people in the bus.

(Pak etek muncak : “Alah kanai lo baliak. Kita kena lagi!”(10)) ; (Saleh : “Gue dari jakarte, anak betawi asli. Tahu Monas, kan? Nah, rumah gue gak jauh dari sana, di Karbela, katanya dengan bangga.

In some data inter-sentential code switching is used to indicate changing that influenced by different ethnic backgrounds, occurred at boundary sentence,

(Burhan : “Koleksi ribuan buku berbahasa arab dan inggris kami pusatkan di perpustakaan yang kami sebut maktabah atau library, kata burhan.”

Ustadz Salman : “ *Shabahul khair.* Selamat pagi. Silakan masuk!” (15)

Ustadz Salman : “ *Ilisuu,* silakan pilih tempat duduk paling nyaman buat kalian.”), with change the situasional into informal (Ustadz kholid :“ Baiklah, kita coba besok pagi ya. *Sa'ah saadisah tamaman.* ” Jam enam

c). Establishing continuity switches

The third type of code switching is occurred to continue in sentence of the previous speaker, when one of Indonesian is spoken English and other speakers tries to respond in English also.

[8] Alif : “Assalamualaikum, ustaz,” sapaku. (78)

In emblematic switching which occurs within a clause boundary.

Emblematic switching often takes place in exclamation. When the speaker express her emotional she/he will feel angry, happy, and disappointed.

e). Internal code switching

That is occurs between inter-regional language in one national language, inter-dialect in one regional, or between any register and style

contained in a dialect.

According to Suwito, it is participated two or more regional language in one national language, or two or more dialects in one regional language even different Sunda dialect and Indonesian language, or Sunda dialect and Madura dialect.

B. Findings on speaker's motivations that influence the characters in the novel *Negeri 5 Menara* by A. Fuadi.

When code switching or code mixing occurs, the motivation or reasons of the speaker is an important consideration in the process. According to Hoffman (1991:116), there are a number of reasons for bilingual or multilingual person to switch or mix their languages. Those are:

1) Talking about a particular topic

People sometimes prefer to talk about a particular topic in one language rather than in another. Sometimes, a speaker feels free and more comfortable to express his/her emotional feelings in a language that is not his/her everyday language.

The case can be found in this statement for example :

Ibu : "Tentang sekolah waang, lif... ". Amak berbicara pada Alif tentang sekolah yang akan dilanjutkan Alif setelah lulus Madrasah tsanawiyah.

Alif : "Iya mak, besok ambo mendaftar tes ke SMA. Insya Allah, dengan doa Amak dan ayah, bisa lulus..."

Ibu : "Buyuang, sejak waang masih di kandungan, amak selalu punya cita-cita,".

Ibu : "Tapi bukan salah ambo, orang tua lain mengirim anak yang kurang cadiak masuk madrasah..."

This example tell about the conversation Alif mother's talks to Alif about his school after school in junior high school.

2) Quoting somebody else

A speaker switches code to quote a famous expression, proverb, or saying of some well-known figures. The switch involves just the words that the speaker is claiming the quoted person said. The switch like a set of quotation marks. In Indonesian, those well known figures are mostly from some English-speaking countries. Then, because many of the Indonesian people nowadays are good in English, those famous expressions or sayings can be quoted intact in their original language.

3) Being emphatic about something (express solidarity)

As usual, when someone who is talking using a language that is not his native language suddenly wants to be emphatic about something, he either intentionally or unintentionally, will switch from his second language to his first language. Or, on the other hand, he switches from his second language to his first language because he feels more convenient to be emphatic in his second language rather than in his first language.

For example :

*Alif : “**Thayib ya akhi ila bandung.**” **Oke,** kita ke bandung.*

*Said : “**Syukron ya ikhwani lihudurikum**.... Pokoknya kalian tidak akan rugi main ke sini dulu,” katanya sambil mengangkat koperku*

In this sentences expressing agreement from Alif when he invited by Said go to bandung and than expressing happy from Said when his friend arrive to in Said house's.

4) Interjection (inserting sentence fillers or sentence connectors)

Interjection is words or expressions, which are inserted into a sentence to convey surprise, strong emotion, or to gain attention. Interjection is a short exclamation like: Darn!, Hey!, Well!, Look!, etc. They have no grammatical value, but speaker uses them quite often, usually more in speaking than in writing. Language switching and language mixing among bilingual or multilingual people can sometimes mark an interjection or sentence connector. It may happen unintentionally.

The following are examples of the usage of interjection in sentences:

Bagian keamanan : "Qif ya akhi !..... BERHENTI SEMUA!" suara keras mengguntur membuat kami terpaku kaget.

Alif : "Yes, terimakasih Allah. Kataku sambil mengepalkan tanganku ke udara.

5) Repetition used for clarification

When a bilingual or multilingual person wants to clarify his speech so that it will be understood better by listener, he can sometimes use both of the languages (codes) that he masters to say the same message. Frequently, a message in one code is repeated in the other code literally. A repetition is not only served to clarify what is said, but also to amplify or emphasize a message. For example:

Pak etek muncak dan kenek : "Alah kanai lo baliak. Kita kena lagi!"

Ustadz salman : "Shabahul khair. Selamat pagi. Silakan masuk!"

Kiai Rais : "Marhaban. Selamat datang anak-anakku para pencari ilmu. Welcome. Selamat datang. Bien venue."

6) Intention of clarifying the speech content for interlocutor

When bilingual or multilingual person talks to another bilingual/multilingual, there will be lots of code switching and code mixing occurs. It means to make the content of his speech runs smoothly and can be understood by the listener. A message in one code is repeated in the other code in somewhat modified form.

For example :

Raja : "Bos, kau ini murid macem mana ni, kok bisa gak tahu. Ini dia kiai kita, almukarram.

Burhan : “*Koleksi ribuan buku berbahasa arab dan inggris kami pusatkan di perpustakaan yang kami sebut **maktabah** atau **library**, kata burhan.*”

In this example, the sentences clarifying about something, someone, or some place to interlocutor.

7) Expressing group identity

Code switching and code mixing can also be used to express group identity. The way of communication of academic people in their disciplinary groupings, are obviously different from the other groups. In other words, the way of communication of one community is different from the people who are out of the community.

For example :

Atang	: “ Masya Allah , ini ente , Atang dari Bandung? sutradara batutah?”
Alif	: “Atang, di mana ente sekarang?”
Atang	: “ Ana lihat nama ente jadi panelis di London minggu depan ?”
Atang	:” Kita suruh dia jadi guide ke Trafalgar Square seperti yang ada di buku reading kelas tiga dulu.”

In this example the dialog expressing group identity when Alif and Atang in Pondok Madani. Because in there they are must be speak English and Arabic.

8) To soften or strengthen request or comment

For Indonesian people, mixing and switching Indonesian into English can also function as a request because English is not their native tongue, so it does not sound as direct as Indonesian. However, code

mixing and code switching can also strengthen a command since the speaker can feel more powerful than the listener because he can use a language that everybody cannot.

Example :

- | | |
|------|---|
| Alif | : " <u>Ustadz</u> , saya mau beli <u>galam</u> kaligrafi di kota karena di sini tidak ada..." |
| Alif | : "Saya ingin mencoba kaligrafi <u>khoufi</u> yang penuh garis-garis dan hiasan daun, Tad." |

In the example the speaker strengthen their request for the interlocutor by switching language Indonesian in to Arabic.

9) Because of real lexical need

The most common reason for bilingual/multilingual person to switch or mix their languages is due to the lack of equivalent lexicon in the languages. When an English-Indonesian bilingual has a word that is lacking in English, he will find it easier to say it in Indonesian. And vice versa, when he has a word that is lacking in Indonesian, he will use the English term. If it put into Indonesian, the meaning will be hazy / vague, and sometime it would not be used. For example, in Indonesia, the technical topics are firmly associated with English and the topic itself can trigger a switch or mix to/with English.

10) To exclude other people when a comment is intended for only a limited audience.

Sometimes people want to communicate only to certain people or community they belong to. To avoid the other community or interference

objected to their communication by people, they may try to exclude those people by using the language that no everybody knows.

Actually, Hoffman (1991:116) gives ten reasons bilingual person switch their language, but only seven numbers that can be found in novel *Negeri 5 Menara* by A. Fuadi.

In this data the researcher found many percentage from the novel, it is the all percentage total 99,7 % from many different occurs switches.

6) The frequency of occurrence types of External Code Switching

This data form occurrence of types External Code Switching and the researcher found the percentage from the table.

Table 1.5 – The frequency of occurrence types of External Code Switching

Types of external code switching	Number	Percentage
A – I – A – I	3	8,6 %
I – A – I	10	28,6 %
I – E – I – E	2	5,7 %

From the table the researcher found many percentage. It is A – I – A – I 8,6 % ; I – A – I, 28,6 % ; I – E – I – E ; 5,7 % , I – E – I; 8,6 % , I – E ; 11,4 % , A – I; 5,7 % , I – A – I – E , 2,8 %; I – A; 2,8 % , A – I – E – I, 2,8 % ; , E – I – E – I ; 2,8 % , E – I – E – I – A – I ; 2,8 % , I – E – I – A – I; 2,8 % , I – A – I – A ; 5,7 %.

7) The frequency of occurrence types of code switching

Table. 1.6 – The frequency of occurrence types of Code Switching

Types of code switching	Percentage
Intra-sentential switches	28,8 %
Inter-sentential switches	21,8%
Establishing continuity	5,1 %
Emblematic switching	12,8 %
Internal code switching	8,3 %
External code switching	23,0 %
TOTAL	100%

In this table 1.6 it is found out that the highest frequency found in the novel is Intra – Sentential switches. Because there are some English words that are familiar to the characters so that they can easily use them in their dialogues (within the sentence) . And the lowest percentage is establishing continuity, because the speaker little using it. In the novel occurs the switches within sentence, the speaker always using code switching so in the sentence little using establishing continuity.

B. Discussions

Based on the data analysis, the researcher found six types of code switching occurring in the *Novel 5 Menara*. Intra – sentential switches, Inter – sentential switches, Establishing continuity, Emblematic switching, Intern code-switching, and Extern code-switching are the types of code switching.

In the data, also analysis speakers motivation occurring from the sentences in novel *Negara 5 Menara*. This study analysis based on the Hoffman's argument. From Hoffman argument there found ten speakers motivation, that is (1) talking about a particular topic , (2) quoting somebody else (3) being emphatic about something (express solidarity), (4) interjection (inserting sentence fillers or sentence connectors), (5) intention of clarifying the speech content for interlocutor, (6) repetition used for clarification (7) expressing group identity, (8) to soften or strengthen request or command, (9) the need real lexical, (10) to exclude other people when a comment is intended for only a limited audience.

In this data finds out the types and the factors of code switching based on Hoffman's theory. My research is same with research Analysis Of Code Switching And Code Mixing *In The Teenlit Canting Cantiq* By Dyan Nuranindya by Dias Astuti Cakrawarti.

The similarly in analysis theory and used theory but it has many differences : data analysis and the explanation while method of rsearch used.

Next, the finding of the study also show the frequency of occurrence code switching. Percentage of Intra-sentential switches occurs in the amount 28,8 %, Inter-sentential 21,8%, Establishing continuity 5,1 % , emblematic switches 12,8%, intern code switching 8,3 %, extern code switching 23,07 %.
