ABSTRACT

Final project with the title "Analysis of Financial Performance Measurement of Sharia Commercial Banks Using Risk Based Bank Rating (RBBR) and Sharia Conformity and Profitability (SCnP) Models (Case Study of Sharia Commercial Banks in Indonesia from 2016-2023)" was written by Kurnia Nur Putri Wijayanti, NIM 126401201015, Faculty of Economics and Islamic Business, Sharia Banking Study Program, Sayyid Ali Rahmatullah State Islamic University Tulungagung, Supervisor Dr. Muhamad Aqim Adlan, S.Pd.I., M.E.I.

This research is motivated by the importance of sharia banking in meeting the financial needs of Indonesia's predominantly Muslim population. The emergence of sharia banking reflects the demand for financial services that comply with sharia principles, so that Islamic banking has the challenge of being able to operate effectively to meet the needs of the Indonesian people. Based on this urgency, the researcher addresses issues related to the performance of sharia banks, aiming to evaluate the effect tiveness of the Sharia Conformity and Profitability (SCnP) and Risk Based Bank Rating (RBBR) methods in assessing the performance of sharia banks and their impact on public trust and stakeholder confidence.

This research uses a descriptive quantitative approach with secondary data from Sharia Commercial Banks for the years 2016-2023. The sampling technique is non-probability sampling with a purposive sampling approach, focusing on five Sharia Commercial Banks in Indonesia. Data analysis is conducted using RBBR and SCnP methods. In data analysis, researchers used SPSS 26 and Microsoft Excel Software. The results indicate that the financial performance of sharia banks is categorized as sufficiently healthy according to RBBR, while SCnP analysis reveals variations across four quadrants, with some banks being stable and others in recovery.
