Search tips:

- Search terms are case-insensitive
- Common words are ignored
- By default only articles containing *all* terms in the query are returned (i.e., *AND* is implied)
- Combine multiple words with *OR* to find articles containing either term; e.g., *education OR research*
- Use parentheses to create more complex queries; e.g., *archive ((journal OR conference) NOT theses)*
- Search for an exact phrase by putting it in quotes; e.g., *"open access publishing"*
- Exclude a word by prefixing it with - or *NOT*; e.g., *online -politics* or *online NOT politics*
- Use \* in a term as a wildcard to match any sequence of characters; e.g., *soc\* morality* would match documents containing "sociological" or "societal"
