This research is motivated by the problem of stock price fluctuations which are influenced by several factors. Company performance is an important factor considered by investors and stakeholders in the financial market. Therefore, companies must improve their financial performance in order to contribute to share price appreciation. This increase in share prices can later attract more investors to invest

The purpose of this research is (1) to test the influence of Debt to Equity Ratio (DER), Price to Book Value (PBV) and Price Earning Ratio (PER) on stock prices, (2) to test the influence of Debt to Equity Ratio (DER) on stock prices, (3) to test the influence of Price to Book Value (PBV) on stock prices, (4) to test the influence of Price Earning Ratio (PER) on stock prices.

This research applies an associative approach with quantitative research methods. The sampling technique used was purposive sampling. The data analyzed is secondary data sourced from the quarter financial reports of PT Indofood Sukses Makmur Tbk during the 2016–2023 period, with a total sample of 32 samples. The data analysis techniques used are descriptive tests, classical assumption tests, multiple linear regression tests, coefficient of determination (R²) tests, hypothesis tests which are processed using SPSS 30.

The research results show that simultaneously (1) Debt to Equity Ratio (DER), Price to Book Value (PBV) and Price Earning Ratio (PER) have an effect on stock prices, (2) partially Debt to Equity Ratio (DER) has no effect on stock prices, (3) Price to Book Value (PBV) has an effect on stock prices, (4) Price Earning Ratio (PER) has no effect on stock prices.

Key words: *Debt to Equity Ratio (DER), Share Prices, Price to Book Value (PBV), and Price Earning Ratio (PER).*
