

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents conclusion and suggestion. The conclusion is substantively tied up with the research finding as the answer of research question and also summarizes of discussion of the research finding. Meanwhile, the suggestion is a reflection of the presentation of the research finding, the discussion and the conclusion.

A. Conclusion

Edmodo is a social network designed for teacher or student interaction with an emphasis on quick communication, polling, assignment sharing, and more. Through the analysis of the findings gained from the students' writing pre-test and post-test, it was concluded that the contribution of Edmodo in writing led to a higher level of writing improvement. Using Edmodo facilitates students in submitting their works, sharing knowledge, knowing their progress, trying to be actively participate in teaching and learning process, interacting with each other without face-to-face meeting, and so on. The findings revealed that after using Edmodo in post-test, the students' score were significantly better. Therefore, consequently, after doing some statistical test indicating that Edmodo was effective, the researcher concluded that Edmodo is a useful way of increasing students' achievement in writing narrative text and can play an important role in teaching writing to the eighth graders of MTsN Tulungagung.

Based on the findings there is significant different between the result of pre-test and post-test. Mean of pre-test is 50.97 and post-test is 68.91, and the t_{count} was higher than t_{table} ($11.510 > 2.032$). It was confirmed that Edmodo Educational Website has a significant effect on the students' achievement in writing narrative text of eighth grade students of MTsN Tulungagung.

The result of this study indicated that there was a significant different in use Edmodo Educational Website for the students' writing achievement. It was confirmed that using Edmodo in learning was likely to be more interesting, showed by the result of the pre-test and post-test that Edmodo had a high level of acceptance either from teachers or students side (Kongchan, 2012).

B. Suggestions

Hopefully if the future researcher wants to conduct the next research that used Edmodo Educational Website can be better, more clear and detail. It means that the future researcher should not focus on writing skill and the scope of subject as the sample can be larger than this research. Because in this research, the researcher used pre-experimental design with one group pretest and posttest. In future researcher can use another design of research likes quasi, classroom action research, and so on. So, the research can show the different result and can be more detail than previous research.
