

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

In this chapter, the researcher presents conclusions and suggestions. The conclusions are substantively tied up with the research findings as the answers of research questions and also summarize of discussion of the research finding. Meanwhile, the suggestion is a reflection of the presentation of the research finding, the discussion and the conclusion.

#### **A. Conclusion**

Public figure picture is important in teaching and learning process. It is used as facilitator or connector in delivering the material from the teachers to the students. The good situation and condition can be created by using public figure picture. It makes the students motivation in the learning process increase.

Based on the findings there is significant different between the result of pre-test and post-test. Mean of pre-test is 63.57 and pre-test is 77.77, and the  $t_{count}$  was higher than  $t_{table}$  ( $9.950 > 2.032$ ). It was confirmed that public figure picture has a significant effect on the students' achievement in writing descriptive text of eighth grade students of SMPN 3 Kedungwaru Tulungagung.

The result of this study indicated that there was significant different in the effectiveness of public figure picture for the students' writing achievement.

## **B. Suggestions**

The findings show that there is significant effect of teaching using public figure picture toward students' achievement in writing descriptive text. Therefore, the researcher can give some suggestions to the teacher or instructor who wants to use public figure picture in teaching writing descriptive text or the next researcher who wants to conduct the similar study.

This study uses pre-experimental research design which focuses on one group only to conduct pre-test and post-test. Therefore, this study has no other group that is used to compare the result of pre-test and post-test scores. Hence, researcher gives suggestion to conduct a true experimental research for the future researcher who wants to conduct the similar study in order to get more scientific result. Then, the researcher also suggests to conduct the same study in different level such as elementary school and university in order to be able to know whether teaching using public figure picture in writing descriptive text is really effective for all levels or not.

In addition, future researcher is also suggested to try teaching using public figure picture for other skill in order to know whether it is also

effective or not since the researcher himself uses this media for writing skill.
