

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher presents the conclusion and suggestions based on research finding and the discussion presented in the previous chapter.

A. Conclusion

Based on the result of using Place Based Education strategy in writing descriptive text on seven grade students of SMP Negeri 1 Kalidawir, it is concluded that There is a significant difference between students' achievement before and after being taught by using PBE strategy.

Based on the result of processing data from SPSS 16.0 version software shows that the alternative hypothesis (H_a) is accepted and the null hypothesis (H_0) is rejected. The significant value of this research is 0.000, standard significant level is 0.050. It can be drawn as $0.000 < 0.050$ or the significant value is smaller than significant level. So, it can be concluded that Place Based Education strategy is effective to use to improve students writing in type of poem, journal, or just writing assignment and to improve students' achievement in writing Descriptive text.

B. Suggestions

Based on the conclusion above, the researcher suggests to English teacher and future researcher as follows:

1. English Teacher

The teachers are suggested to use Place Based Education strategy as an alternative strategy to increase students writing achievement. PBE or Place Based Education offers real and direct learning toward students activity. By involving students senses outside the classroom, the students can be more independent and active in learning. This is very suitable to be applied as in curriculum 13. It helps the objective of curriculum to support students center in teaching and learning process especially focussing on writing case to increase students comprehension in term of content writing.

2. Future Researcher

The future research can use this research to get inspiring idea, they may develop this strategy or Place Based Education in another cases. In addition, the future researcher can use this research as reference to support some sources their needed. Finally, this research is pre-experimental research design, for the next researcher who conducts to the same strategy is suggested to use large groups with different design of the research.
