

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

Based on the description of findings presented the previous chapter, a conclusion and suggestion are presented in this chapter. The conclusion substantively related to the research finding as the answer of research problems and also summarizes all discussion of the research finding. Meanwhile, the suggestion is a reflecting the research finding, discussion and conclusion.

#### **A. Conclusion**

Based on the research findings, the conclusion of the research as follow:  
The data analysis using Rank Spearman formula result of  $r_{XY}$  based on SPSS 16 is 0.753. Mean while according to the table of rank spearman value with  $N = 20$  at the degree 5% of significance of correlation goes to 0.447 and the degree 1% of significance of correlation goes to 0.570. So, the value of statistical analysis  $0.753 > 0.447$  and  $0.753 > 0.570$ . There is positive correlation between parental support and students' English achievement at MTsN 7 Tulungagung. And it can be conclude that parental support gave effect for the students' achievement in English at MTsN 7 Tulungagung especially for class VII D and E.

#### **B. Suggestion**

Based from the research result for the future, then the researcher gives suggestion that:

1. For Parents

The researcher suggests that parents should give better support, attention and motivation to the children. Because children at junior high school especially still at seventh grade are still very necessary assisted parents in learning especially in English. Given the English language today is important to improve English achievement. So even they are unable to teach the children, they can enrol children in course institution.

2. For Students

The researcher suggests that the students to keep studying hard at school and at home in order to increase English achievement.

3. For English Teacher

The researcher suggests to English teachers to provide motivation to students in the class and create the English lesson is fun lesson.

4. For other Researcher

The result of this research can be used as input or a reference to conduct a further research dealing with a similar problem and will be better if the researcher show the other relevant factors of achievement and apply with the varieties method.
